

RFP 2025 1007: AFMS Vehicle Driver App Bidders Conference

24th February 2025

Project: Overview

Asset and
Fleet Management
Section

UNHCR is looking for a service provider that can give us a vehicle tracking system with the ability (an interface) to record pertinent data:

- Trips – including driver, passenger, vehicle information
- Fuel Events
- Maintenance/Repair Events
- Incident/Accident reporting capability
- Daily inspection checklists

Fleet Telematics

Asset and
Fleet Management
Section

Ensuring integrity and transparency in the management of UNHCR's fleet through innovative technologies.

1

Driver Interface

- Driver and Vehicle identification.
- **Minimal User interaction.**
- Alerts – speeding/braking/fatigue/etc
- Trip verification.
- Passenger data.
- Panic button feature.
- Simple / Multi-lingual UX design.
 - Fuel Events
 - Trip Events
 - Daily Checks
 - Maintenance Events
 - Incident/Accident reporting
 - Gamification

2

Admin. Interface

- Global oversight.
- Access control lists with role-based privileges.
- Flexible configuration.
- Office and Country oversight for drivers and fleet. Driver behaviour, vehicle maintenance.
- **Vehicle immobilisation.**
- Simple UX design.
- Gamification configuration.

3

Data Transmission

- **GSM only with hybrid option.**
- Cheaper alternative to satellite.
- Regular global reach.
- Online / Offline capabilities.
- Automation where-ever possible.
- **Interoperability with existing UNHCR solutions. (ie Oracle ERP, Data Lakehouse).**
- Single source of data.
- Logical data separation between Partner/UNHCR/geography/organization hierarchy.

4

Hardware

- In-Vehicle devices.
- Hand-held devices
- **Exploit OBD2/J1939 data protocols.**
- Hard wired internal/external equipment
- Supplementary adapters & peripherals
- Controller interfaces
- Ingress / Tamper-proof protection
- Cradle

Timeline proposal

Highlevel

Asset and
Fleet Management
Section

Q1 2025

Plan

- 01** Launch RFP
- 02** Coms & Testing Plans
- 03** Identify proof of concept site

Q2 2025

Execute

- 01** Contract Award
- 02** Solution development
- 03** Training plans

Q3 2025

Test

- 01** Solution testing
- 02** Solution proof of concept – live trials
- 03** 'Early Adopters'

Q4 2025

Deploy

- 01** Implementation plans
- 02** Communications across all Fleets
- 03** Live trials in Operations

Q1 2026

Close

- 01** Support post Go-Live
- 02** Monitor financial benefits
- 03** Lessons learned

Proposal Evaluation Process

Asset and
Fleet Management
Section

Bidders are required to thoroughly review the RFP cover and its Annexes. The evaluation process will be conducted as outlined below.

1

Evaluation Process

Technical and Financial proposal must be submitted separately.

Three Stage Process:

1. Mandatory Requirement
2. Technical evaluation of the proposal
3. Financial Evaluation

IMPORTANT: No financial information shall be included in the technical proposal. Failure to comply will result with disqualification.

2

Mandatory Requirement

- **Evaluated with Pass/Fail**
- Bidders must meet all mandatory requirements to proceed to the technical evaluation
- Failure to meet these criteria will result in disqualification.
- The full list of mandatory requirements can be found in the **Annex B**.

3

Technical Evaluation of the Proposal (70%)

- **Weighted Scoring**
- Bidders that pass the mandatory criteria proceed to technical scoring
- Evaluated based on the defined criteria with minimum passing thresholds 42% out of 70%
- Scoring breakdown (weights)
 - Company Qualifications (5%)
 - Proposed services (62%)
 - Managed Service Governance (3%)

Refer to **Annex B** for the complete Technical Evaluation criteria and scoring methodology.

4

Financial Evaluation (30%)

- **Only technically qualified bidders will proceed to financial evaluation.**
- In case of conflicting information in Annex C and Cloud ERP, the pricing/costs given in Annex C (Financial offer form) prevail.
